**2017 Application Guide**

# CABIN AIR FILTER Application Guide

Cabin Air Filters become clogged with dust, soot, dirt, bugs, leaves, mould spores and pollen, restricting your vehicle air conditioning system.

Cabin Air Filters should be changed regularly, especially if:

- You frequently travel in heavy traffic.
- You often drive in dusty conditions.
- You have dust allergies.

**It is recommended that vehicle cabin air filters be replaced every 15,000km / 12 months.**

***ADAIR Cabin Air Filters meet or exceed OE specification to provide optimum air quality.***

**Search for your Cabin Air Filter by Vehicle Make / Model.**
