## Welcome

Steve Vassallo  
Business Development Manager  
– Air Conditioning

Welcome to our NEW Air Conditioning Products Newsletter titled “The Fridge”.

The Fridge is full of fresh products and information to whet the appetite of professional automotive air conditioning technicians across the country. Each edition will contain a smorgasbord of news to feed those

who are hungry to keep up with what’s going on in the industry. Over the last 18 years with Adrad, I’ve seen the product range grow by many thousands of parts. This certainly keeps our staff on their toes as we constantly add and update our product range. It’s no simple matter to source the right parts, as they need to satisfy Adrad’s quality and performance criteria as well as meeting the obvious fitment and operational specifications.

Keeping up with the latest developments in product design technology helps us to provide our customers with the most up-to-date parts range for engine cooling and air conditioning. In 2018, we are expanding our parts range even further to include new products such as replacement belts, windscreen wiper blades and much more.

Adrad staff can provide you with the latest fitment information for old and new vehicle applications, from direct fit air-conditioning and cooling system

parts for popular vehicle makes and models to universal fit parts that you can confidently stock in your workshop.

Adrad is focused on the future, and this includes expanding our air conditioning range so we can supply you with the parts you need. Our extensive warehouse and distribution network means that parts can be delivered quickly and include our national warranty support.

As our valued customer, your feedback is important to us, and if there’s ever a product that you’re struggling to locate, please don’t hesitate to get in touch with us.

I look forward to expanding Adrad’s air conditioning product business by creating and providing industry-leading product offerings that benefit both repairers and vehicle owners alike.

Keep on reading to find out “What’s in The Fridge”.

## COMPRESSORS

**MORE RESISTANT.  
HIGHER OUTPUT.  
NO WORRIES.**

At DENSO we’ve taken everything we have learned as an OE manufacturer and applied it to our aftermarket product lines. Every component that leaves our factory has been designed with precision, manufactured to OE standards and subjected to rigorous safety and performance tests.

**THRUST BEARING**

Structured to withstand stress for maximum durability.

**VALVE SHAFT & SWASH PLATE**

Designed with a lightweight aluminium alloy for added strength.

**UNIQUE RUBBER HUB**

Reduces noise & vibration.

**WORLD LEADER IN COMPRESSORS**

DENSO has over 40% OE market share.

## Adair Auto Air Products

Adair condensers, compressors and parts represent industry leading quality whilst delivering great value for money.

Sourced from leading global air conditioning component manufacturers, all Adair air conditioning parts meet our extensive in house quality testing prior to release.

With the ever increasing availability of cheap copy product in the Australian aftermarket, it is essential for all businesses to source only quality parts from established quality assured parts suppliers so as to provide your customers with the best experience.

Adair air conditioning parts are available through Adrad's extensive National Distribution Network.

Adrad is a ISO9001:2015 quality accredited supplier, with a dedicated quality assurance department that provides warranty support and continually monitors products to ensure they meet the required specifications.

### Tech Tip

#### *Did You Know?*

The most common expansion valve failure is due to valve charge head leaks?

System contaminants lodged in the valve inlet orifice may also affect valve metering and flow capabilities, suspected metering inconsistencies may, over time, have distinct characteristics;

- On a starving Expansion Valve, visible frost will form on the inlet of evaporator.
- A Flooding Expansion Valve emits a hissing sound upon system shutdown.

Adrad has a comprehensive range of performance fans from

## Valeo Compressors

Valeo provide compressors for automotive air conditioning systems, including controlled air conditioning compressors, with reduced energy requirements.

Valeo's broad product line includes both fixed displacement and variable displacement models, with several technology types, such as swash

plate, vane rotary and reciprocating compressors.

With Valeo's policy of excellence, you can expect robust and reliable products with enhanced performances while lowering fuel consumption.

Worldwide, Valeo have 9 Plants, 7 R&D Centres and 15 Sales Offices servicing

their compressor range and have a long history in manufacturing compressors. The Valeo Compressors legacy dates back to 1958, when, in the Japanese prefecture of Gunma, the company Tama Manufacturing, founded in 1933, started to produce air conditioning compressors. Tama Manufacturing was renamed Zexel Valeo Climate Control Corporation in 2000, when it absorbed former Zexel Climate Control business, and welcomed Valeo Group as one of its major shareholders.

In 2005, following a successful merge with Valeo Climate Control business, Zexel Valeo Climate Control Corporation became a fully owned subsidiary of Valeo. Since then, Valeo Compressors has been one of the fastest growing product families of the Valeo Group, taking advantage of both Eastern and Western cultural backgrounds for superior quality and performance.

## Adrad Gives a Belting

Adrad now stocks Optibelt products. Optibelt are a leading global manufacturer of high performance drive belts. Combining German engineering precision with the latest technological developments, Optibelt create drive solutions with durability and OE quality that will meet the demands of your customers.

### RIBBED BELTS

The Optibelt RBK is a high performance ribbed belt for all standard ancillary drives in passenger cars.

Even under environmental influences such as dust, moisture and extreme temperatures, the RBK provides for secure and silent power transmission.

### V BELTS

With a raw, moulded edge, Optibelt V-belts are a cost-effective option and are suitable for use in passenger

car engines. V-belts require little maintenance, and will run smoothly even in small pulley diameter applications.

### TIMING BELTS

The Optibelt ZRK timing belt consistently delivers optimum power transmission after thousands of operating hours.

Sophisticated material combination provides silent and versatile control of engine components.

Advanced materials and superior construction provide high tensile strength and stability with resistance to abrasion and temperature variations.

## Product Talk with CJ

**CJ Shaw**  
Category Manager - Air Conditioning

Starting as a purchasing officer, CJ has been with Adrad for over 12 years. He is responsible for sourcing new products, implementing new product ranges, manage inventory and ensure quality assurance for all air conditioning items.

CJ also works closely with Adrad's product development and marketing teams to provide the detailed product information found in Adrad's 800+ page air conditioning catalogue.

*Here's the latest product news from the man in the know:*

Over the past twelve months, Adrad has become an official distributor of Valeo, a forward-thinking French automotive supplier focused on reducing CO<sub>2</sub> emissions and developing intuitive driving technology. Valeo wiper blades, water pumps, EGR coolers, compressors, and radiators are now available from Adrad.

Adrad also recently added a range of tools and equipment including gauge sets, leak detectors, UV dye, charge ports and more that are designed to suit environmentally friendly HFO-1234yf refrigerant systems found in newer cars.

The most exciting news is the launch of an industry-first - the Adrad A/C Compressor Kit range which features a national 3-Year Warranty.

These kits are available for over 200 different vehicle applications.

Purchasing an A/C Compressor Kit saves hunting around for each individual replacement part needed to do the repair. Saving workshop time means saving money as it's quicker than buying individual parts. If this wasn't enough already, when you purchase an A/C Compressor Kit it comes with a full, nationally supported, 3-year Warranty rather than the standard 12-month warranty on individually purchased parts.

Refer to the Adrad A/C Compressor Kit article in this edition of The Fridge to learn more about how this new offering will benefit workshops and customers.

The product team at Adrad value your input, so if you need information about Adrad's product range, send in your questions to [product@adrad.com.au](mailto:product@adrad.com.au).

## Adrad A/C Compressor Kits

Adrad is excited to announce the release of the heavily expanded A/C Compressor Kits Range, featuring an industry first 3 Year Warranty.

It's commonly accepted that even extensive flushing of the A/C system may not be enough to remove all fine particles that contaminate a vehicle A/C system;

- Micro-ports in parallel flow condensers found in 8/10 vehicles are 1 mm wide or less & too small to be effectively flushed.
- The filter drier is exposed to debris and cannot be completely flushed.
- Fine debris lodged in an expansion device cannot be thoroughly flushed.

Adrad A/C Compressor Kits provide the easiest and most reliable way to repair contaminated A/C systems. Compressor Kits include all the parts needed to completely restore the vehicle air conditioning system back to new condition.

What are the main benefits of using Adrad A/C Compressor Kits?

- Adrad are so confident in the range that they offer an extended 3 year warranty, giving you peace of mind should any claims arise.
- Minimise (virtually eliminate) the risk of compressor failure down the track due to recontamination.
- No time wasted flushing contaminated parts. (Let's face it, you'll probably never get them completely clean).
- Just one part number includes everything you need, making ordering simple. There are 147 different A/C Compressor Kits available covering over 200 makes and models.

Adrad feels the extended 3 Year Warranty is a game changer and should further benefit repairers who are already performing the best practice of replacing contaminated parts and encourage the rest of the industry to follow suit to make it standard practice.

## Cool New Catalogue for 2019

We're excited to announce that our 2019 Adrad Air Conditioning Catalogue is coming soon!

Regarded as the bible for quality AC parts, the new 2019 catalogue contains hundreds of new products.

The new publication boasts around 800 pages and presents over 3,500 air conditioning part numbers. The catalogue also features an easy to follow make/model layout and a fast-find index that provides

fast navigation directly to the relevant page.

Another handy feature is the identification of brands for individual parts. This emphasises the strength of the entire Adrad Air Conditioning range indicating international brands such as ADAIR, DELPHI, DENSO, KOYOAIR, MARADYNE, SANDEN, SPAL, VALEO, and more.

The Adrad air conditioning products range includes thousands of aftermarket and OE parts, fittings, tools, equipment, cabin filters and refrigerants.

Over 95% of products sold by Adrad are photographed for cataloging & viewing via an online sales platforms.
