SUMP PLUGS

Tridon sump and oil drain plugs are designed as a direct replacement to ensure that a tight seal is achieved every time.

Tridon's new range of 34 sump plugs has been developed to cover over 10 million vehicles throughout the Australian and NZ market. Popular modern vehicle manufacturers now utilise both the original style sump plugs and the newer style replaceable polymer oil drain plugs in their vehicles.

- Tridon sump plugs are made of either high quality carbon steel or polymer and are supplied with o-rings or gaskets
- O-rings and plugs can deteriorate with repeated fittings leaving your vehicle prone to leaks
- Replacing your sump plug at every service ensures leak free operation of your vehicle
